

**BOB OSHODIN ORGANIZATION LIMITED**

## **Product Catalogue**

**Established Since 1962**

**S**ince 1962 Bob Oshodin Organization Limited has been creating exotic and elegant wooden furniture, fittings accessories, exclusive decorations for commercial centres, private and residential housing, sports and recreational facilities around the globe. Our mission remains to provide finest quality furnishing products at competitive prices. Our products are very highly-ranked worldwide.

BOO furniture establishes warmth and character to the setting. From magnificent bedroom suites to comfortable easy chairs, BOO makes furniture destined to be enjoyed through several generations. Each of our products pass through a rigorous multi-step finishing process which has become the signature of all BOO furniture pieces.

BOO Limited has for decades been the leader for the wood processing industry in Africa - manufacturing finest quality furniture items money can buy. In residential, commercial and recreational decorating projects, BOO furniture are able to instantly create an atmosphere of trust, dignity and success, while also making a positive statement about the owner's vision and focus.

At BOO Limited, we are professionals in wood furniture manufacturing. Our state-of-the-art factories are fitted with the latest and most accurate equipment on the continent. We have exported our finished, elegant furniture items to USA and major parts of Europe. Our custom manufacturing capabilities also enable architects and designers meet their specific needs for casegoods and other custom design residential and commercial furniture.

BOO Limited has been internationally recognized for its outstanding furniture designs through prestigious awards given by various institutes and associations.

# ***SPECIFICATIONS***

## **1. QUALITY OF WOOD:**

All wood required for the office furniture will be fabricated with high Grade A Mansonia wood/planks, plywood and chipboard (for use in E.g Lipping, Routing, Plinth-base, etc), with Mansonia veneer, applied with resin glue and other chemical, under a hot press of 8000kh weight for that perfect finish.

## **2. TREATMENT OF WOOD & DRYING METHOD**

Each wood/plank is individually inspected by personnel from the quality control section before acceptance by the company. The wood/planks are kiln dried in our 30 tone kiln dried & wood treatment plant, with a standard 11%-13% retained moisture level being maintained. The wood/planks are also treated against infection of woodworms, insect attacks, etc.

## **3. WOOD FINISHING:**

All furniture component both exposed and unexposed will be Matt Lacquered with acid catalyst 10:1 hardener/Matt lacquer applied on by the curtain air lacquer machine and pneumatic spray guns.

A top coat of finishing chemical – Epibel or Epoxy is applied twice for the final finish.

In between the 1st and 2nd application is a period of 13-236hours drying. The last coat is also given a drying period of 14 days in normal atmosphere and 5 days in our finishing oven to remove all chemical emission from epoxy, polyester, polyethane or acrylic used.

## **DELIVERY AND STORAGE**

Delivery of our products is available to customers all over the world by best possible means. Delivery, including exports (shipping) is done in well padded delivery trucks, vans and containers. This ensures the safety of our well packaged products. For local deliveries within Nigeria, our company has a fleet of high-powered diesel trucks that deliver client's furniture. Furniture items manufactured and produced are stored in or warehouse pending for delivery and installation.

Our warehouse are moderate capacity, however, when there is a huge production, our storage system is maintained and complemented with the Resident manager or other appropriate personnel on site on the status of erection of houses structures. This guide us greatly in ensuring that pre-production plan strategies are maintained, accelerated or slowed down to accommodate client need within a certain limited period of time.

## **ORDERS**

Regardless of physical description of goods in this catalogue, most items are available to customers' specific requirements . All items are customizable.
